

Feature Reference Guide – Star Gazer

Slalom

Baselines

You must calibrate your Baseline RPM Settings at each speed without a skier. Ideally, enter an accurate Crew Weight for best pull.

1. Go to "Cal Baseline Mode". (To access, highlight menu arrow > and press up key. With Slalom highlighted, press Down Key to select "Cal Slalom" mode.)
2. Run a timed pass, at end stop boat and highlight Menu Arrow > icon.
3. Press Down Key to enter Calibrate Screen.
4. Press Up Key quickly in Calibrate Screen.
5. System will confirm "Baseline Calibrated"

GPS Slalom Mode

1. Enter GPS Slalom Mode and select speed.
2. Tow skier.
3. At end of pass, the full segment time will be on screen. Press down key for other segment times.

Practice Mode / Timing/ WT/ Prev Times

To enter, highlight Slalom Heading on main screen & Press Up Key.

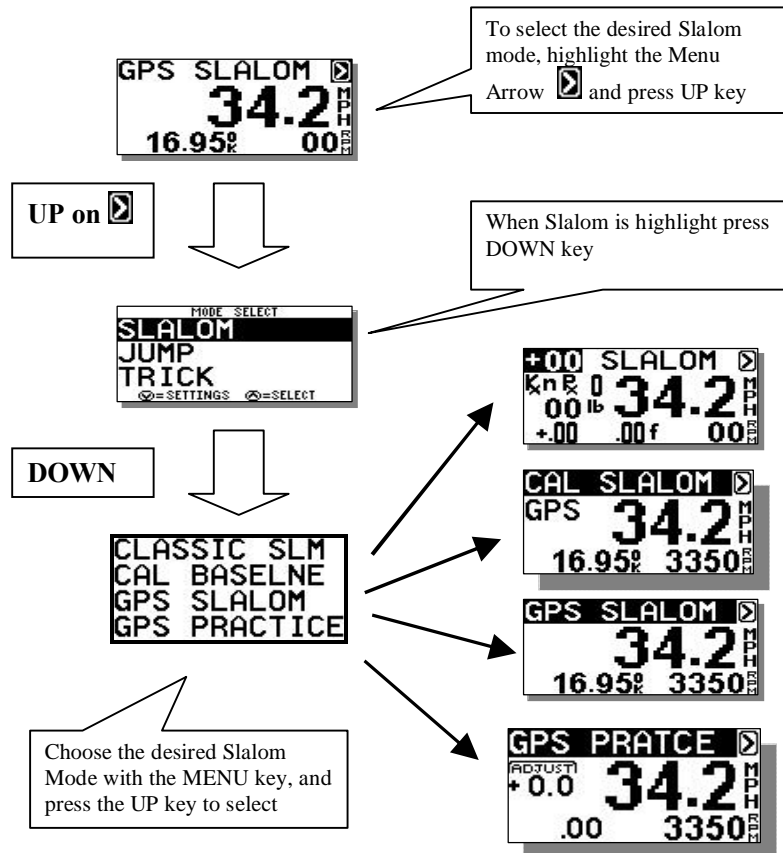

1. GPS/Practice Mode ó In this GPS enhanced Mode, you can adjust set speed Up or Down as desired in .1 mph increments. (Use UP Key to switch between GPS and Practice Modes).
2. Here you can switch between Classic Multi Magnet Timing or the new One Magnet Method.
3. WT- To enter a Wait Time between skiers for tournament use.
4. Previous Times ó To review the times from the last pass.

Screen Contrast / Control Settings CR/CS

Device Test ó To enter these, press Menu and Up Key at the same time.

See back for selecting slalom modes. →

StarGazer Mode Selection Information

There are 3 Slalom Modes to select from:

1. **Calibrate Baseline** ó Used to initially calibrate baselines
2. **Classic Slalom** ó The "original" DigitalPro Slalom Mode.
3. **GPS Slalom** ó The new GPS enhanced Slalom Mode.
4. **Practice Mode** ó You can also switch from Practice Mode < > GPS Slalom on main screen by highlighting the Slalom or Practice heading and press Up Key.
